The thinner hose on the petcock is a vacuum line. It runs from the vacuum port on the #3 cylinder (between the carburetor body and the engine) up to the smaller connection on your petcock. When the engine is turning vacuum is applied to this thinner line and allows fuel to run from the tank into the carburetors.

1981 750 virago. There is one larger diameter vacuum line that connects the mixture control valve (MCV) to the right side carb. There is a smaller diameter vacuum line that connects the MCV to both carbs that is split with a tee. With respect to disconnecting and removing the MCV , is there any reason that I could not get three caps similar as those used to cap extra vacuum ports on an ...
