If you're replacing an existing light fixture, switch, or power outlet, there's usually no need to contact your local building department. But when you run new electrical cable for new service, you'll want to be sure to work with a building inspector and comply with all local codes. This guideline applies to projects that involve wiring several circuits or adding an electrical receptacle.

Everything You Need to Know About Electrical Codes to ...

Wire and cable are used in a wide range of residential, commercial, and industrial applications, including running new circuits inside building walls and ceilings, supplying temporary power to portable tools and equipment, repairing or replacing faulty wiring in automotive components, and extending electrical service underground to sprinkler ...
