The New Origin Of Species

In fact, in Jeanson's revolutionary book, *Replacing Darwin: The New Origin of Species*, he argues that today's ocean of new knowledge has overwritten Darwin's explanations for the origin of species. One of Jeanson's goals for writing *Replacing Darwin* is to point evolutionists to fresh, eye-opening research.

New species that formed on land and emerged from low sea levels could have been wiped out as the sea rose again. These changes leave gaps in the fossil record, making some species appear to be extinct before they actually are, or erasing the record of existence of some species entirely.

The Origin of Species: Chapter IX | SparkNotes

ORIGIN OF THE SPECIES starts as a parable of human evolution and develops as a lighthearted drama. Paul has prepared menus and conversation topics circling the question of how a species evolves. Sex is the catalyst, but sex is only the beginning. Paul's wife, Julia, is ambivalent about being pregnant and has not yet told him about the pregnancy.
